

23andme Final Project Grade

Project Element	Points Earned for Meeting Each Criterion	Points Possible	Points Earned
Decision	<p>0: No decision</p> <p>1: Decision unrelated to whether to be genotyped.</p> <p>3: Decision is related to whether to be genotyped but purpose is not clear.</p> <p>5: Decision and purpose clearly stated.</p>	5	
Rationale	<p>0: No clear rationale.</p> <p>5: Includes general or minimal explanation for the decision. Does not directly connect explanation with evidence.</p> <p>10: Clearly explains scientific basis for the decision, but does not directly connect explanation with evidence.</p> <p>15: Clearly explains scientific basis for the decision, with clear connection to evidence cited.</p>	15	
Opposing Rationale	<p>0: No opposing rationale.</p> <p>3: Includes general or minimal explanation for the opposing decision. Does not directly connect explanation with evidence.</p> <p>6: Clearly explains scientific basis for the opposing decision, but does not directly connect explanation with evidence.</p> <p>10: Clearly explains scientific basis for the opposing decision, with clear connection to the evidence cited.</p>	10	
Evidence	<p>0: No references.</p> <p>3: Only one reference; reference does not directly support scientific rationale for or against decision.</p> <p>5: Only one reference; reference directly supports scientific rationale for or against decision.</p> <p>7: At least two references used, but only one directly supports scientific rationale for or against decision.</p> <p>10: At least two references used; at least one reference supports each rationale.</p>	10	
Reflection	<p>For each of the five questions:</p> <p>0: Question unaddressed</p> <p>1: Question partially addressed (e.g., incomplete sentences, response unrelated to the question)</p> <p>2: Question completely addressed</p>	10	
Total		50
